33 A	Description	×
3A 3BY	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	3A.
3	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the	13CD03A
CD	multiplying the position with the distance from the basket	
58R23CD1	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a	103A3BP
	contiguous subarray of size K from the given array.	10314
3CDO3A?	Note:	-
300	* A subarray is a contiguous part of array.	2823CV
0	* Assume 1 based indexing.	30
38 BRI	* The array contains both negative and positive values.	, A
53"	* Assume the player is standing on a cartesian plane.	L3CD03A
20-		
SBR23CDS	 - input1:An integer value N representing the number of shots made by the player - input2: An integer K representing the size of subarray 	03A 3BR
